About My Skill

My skill set includes a strong foundation in web development technologies. With expertise in HTML, CSS, and JavaScript, I can create visually appealing and interactive user interfaces. My proficiency in ReactJS, a popular JavaScript library for building user interfaces, enhances my ability to develop dynamic and responsive web applications.

Web Design	100 %
Mobile Design	50 %
Development	85 %
SEO	70 %

Web Design

Web design is the process of creating and arranging visual elements on a website to enhance its aesthetics, usability, and overall user experience. It involves the use of graphic design principles, layout techniques, and coding languages to craft a cohesive and visually appealing digital interface.

Mobile Design

Mobile design is the specialized discipline of creating digital interfaces tailored for mobile devices such as smartphones and tablets. It involves optimizing user interfaces and experiences for smaller screens, touch-based interactions, and varying device capabilities. Mobile designers focus on creating visually appealing layouts.

Development

Development, in the context of technology, broadly refers to the process of creating, designing, and implementing software, applications, websites, or other digital solutions. It encompasses a range of activities, including coding, programming, testing, and debugging, with the aim of building functional and efficient solutions to address specific needs.

SEO

SEO, or Search Engine Optimization, is the practice of optimizing online content to improve its visibility and ranking on search engine results pages (SERPs). The primary goal of SEO is to enhance a website's relevance to specific keywords or topics, making it more likely to appear among the top search results when users query related terms.

MOBILE DESIGN

Restaurant Menu App

A restaurant menu design app is a digital tool designed to assist restaurants and food establishments in creating visually appealing and user-friendly menus. This application typically provides a range of features, allowing users to customize menu layouts, experiment with different fonts and color schemes, and upload high-quality images of their dishes. The app may offer pre-designed templates or allow for complete customization, enabling restaurants to showcase their unique brand identity.
